REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's amendments to the claims and applicant's arguments, see page 4, lines 17-30 to page 6, lines 1-3, filed 3/1/05, are convincing in overcoming the prior art rejections of the last office action. The body of independent claims 1 and 18 include limitations directed to making the "axle beam" as also recited in the preamble of claims 1 and 18. Therefore, the limitations in the preamble give life and meaning to the claim and cannot be ignored. The Rogers (US 2,085,829) reference is directed to a method of making beams for a box girder and not an axle beam. Furthermore, the segments that are joined in the claimed invention creates either the top or bottom section of the axle beam, whereas the joined segments (10) in Rogers is the side of the beam. Therefore, Rogers is considered non-analogous art and does not meet each of the claimed features.

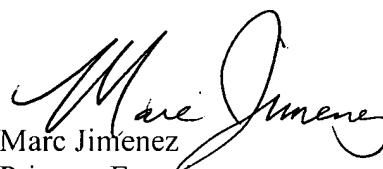

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
